

What is a Fee for Service Practice?

Fee for service dentistry provides people with high quality, appropriate treatment for their needs in exchange for a fair fee considering the time, care, skill, judgment and materials required to render that treatment.

Fee for service dentistry is not based on a fixed fee delivery system (such as a Preferred Provider Organization) that predetermines what the fee should be or how treatment should be rendered (which some insurance companies or managed care plans dictate).

What does that mean for me, the patient?

- ✓ Quality over quantity
- ✓ Excellent communication
- ✓ An excellent investment
- ✓ An enjoyable experience at the dental office

Let's look at each of these statements:

Quality over quantity

We take our time and treat each individual patient like we would want a family member to be treated. We gather all the information needed to make an accurate and conservative plan to help you get the result you are looking for. You and the doctor decide the best plan for you – NOT the insurance company.

Excellent communication

A vital part of dental treatment is to explain to our patients the problems found and discuss reasonable and conservative solutions. Going over out costs, scheduling, and explaining insurance benefits prior to starting treatment is a key part of our plan to help our patients achieve their dental health goals.

An excellent investment

Using new technology with old world proven techniques allows us to provide our patients with comfortable and beautiful restorations that are designed to give many years of service. We use the finest materials and don't cut any corners to ensure you receive the highest quality dentistry and dental care.

An enjoyable experience in the dental office

A caring experienced staff that is focused on making you comfortable at each dental appointment while developing long term positive relationships you is important. Having confidence that you will be taken care of as if you are part of our family goes a long ways towards a peaceful and comfortable dental experience

What is your goal?

- A quick fix or a quality approach?
- A relationship with your dental providers that gives you confidence that every step of your treatment will be done carefully and comfortably?
- The *same* dentist available 24/7 to meet your dental needs?
- A good, long-term investment of your dental health care dollars?
- A conservative, reasonable approach to keeping your natural teeth as long as possible?

WE have been a fee for service dentist for 30 years. If you are tired of the rat race give us a call at Innovative Family Dentistry
